

What is claimed is:

1. A resin plate comprising a base layer and a surface layer placed on at least one side of the base layer, wherein the base layer is made from a methyl methacrylate polymer having about 30 % by weight or more of a methyl methacrylate unit as a monomer unit, and the surface layer has a thickness of about 5  $\mu\text{m}$  to about 500  $\mu\text{m}$  and is made from a resin composition containing about 40 parts by weight to about 95 parts by weight of a methyl methacrylate resin and about 5 parts by weight to about 60 parts by weight of a vinylidene fluoride resin with respect to 100 parts by weight in total of the methyl methacrylate resin and the vinylidene fluoride resin.

2. A resin plate according to claim 1, wherein the base layer has a thickness of about 0.8 mm to about 5 mm.
